ACT	unassigned (pending a committee)

Description of photograph (photograph itself withheld for being mostly ceiling).

Camera N-2 captured the north corridor at 08:14. The frame shows: one (1) potted fern, one (1) mop bucket of unknown allegiance, and the lower left corner of a person who may or may not have been holding a tray.

Analysts zoomed in eleven times. At maximum enhancement the person resolves into a coat hook. The coat hook has been interviewed and declined to comment.

TIME	OBSERVATION	CONFIDENCE
08:14:02	Fern appears to lean left	Moderate
08:14:09	Fern returns to upright	Low
08:14:31	Unidentified crumb enters frame	High
08:15:00	Crumb exits frame, unescorted	High

Recommendation: replace camera N-2 with a camera that points at the corridor.

* Declassified by the Records Office stapler committee. Redactions are decorative. Any resemblance to an actual cafeteria is coincidental.
